ENABLING SWITCH ZSM

- Ergonomic design
- Wide variety of configurations
- Tactile and optical feedback
- Single-hand operation

The ZSM is more than just a conventional enabling switch. Due to its modular design a large number of additional functions can be integrated. Additional components such as a stop command device, LED displays or a key-operated rotary switch make the ZSM a multitasking and almost a small hand-held pendant station. A special feature is the new vibration signal that tells the operator whether the enabling switch is in the enabling position. With its rubberized grip, the switch lies securely in the hand. The well thought-out design and the low weight result in fatigue-free working.

Benefits for you

- Multifunctional due to different versions
- Key-operated rotary switch
- Stop command device
- Mini joystick
- LED displays, etc.
- 3-stage enabling switch
- Feedback in the enabling position
- Ergonomic design
